## ADDISWAY TECHNOLOGY

**A**ddisway Technology Solutions (AWTS), founded in 2019 and located in Addis Ababa, Ethiopia, is a leading information and communication technology (ICT) company that designs and develops customized technological solutions for clients in various industries. Our company was established with the main objective of sharing our knowledge and fulfilling our moral and social responsibility to our beloved country.

At Addisway Technology Solutions, we are dedicated to finding innovative technological solutions for our clients, addressing their specific needs and requirements. We focus on providing our clients with new approaches and new understanding of technology to create solutions that enable them to achieve their objectives effectively and efficiently. Our team of experts has in-depth knowledge and experience in various technological fields, including software development, web design, mobile app development, and networking and security systems.

# ADDISWAY TECHNOLOGY SOLUTION

Expect the unexpected

Our company name, Addisway, reflects our approach to problem-solving. We believe that to effectively tackle complex problems, we must approach them with new ways of thinking and new methods. That's why we are always committed to finding innovative and unique technological solutions for our clients' needs. Our motto "Expect the Unexpected" demonstrates our commitment to providing solutions beyond our clients' expectations.

At Addisway Technology Solutions, we encourage our team members to think creatively and outside the box. We challenge ourselves to zig where others zag, always looking for novel and unconventional ways to solve problems. That's why we guarantee that when you work with us, we will provide solutions that go beyond what you expect.

Our aim is to be the most trusted and innovative company in Ethiopia and beyond, providing our clients with the highest quality technological solutions and services. By working with Addisway Technology Solutions, our clients benefit from our expertise, creativity, and passion for finding technological solutions that help them achieve their goals.

## Our Vision

Our vision is to become a leading tech company in East Africa by creating high-tech, low-cost, and innovative technological products that provide value to our customers and society. We aim to become the go-to technological solutions provider in the region, by being the most innovative and reliable company in the industry.

## Our Mission

At Addisway Technology Solutions, our mission is to provide innovative technological solutions that empower our customers, employees, and ourselves. We believe that technology can help solve complex problems, and we strive to use it to create products and services that make a positive difference in people's lives.

## Our Values

At Addisway Technology Solutions, we are guided by three core values:

- Customer Satisfaction
- Employee Empowerment
- Technology Appreciation

# ADDISWAY TECHNOLOGY SOLUTION

Expect the unexpected

## Customer Satisfaction

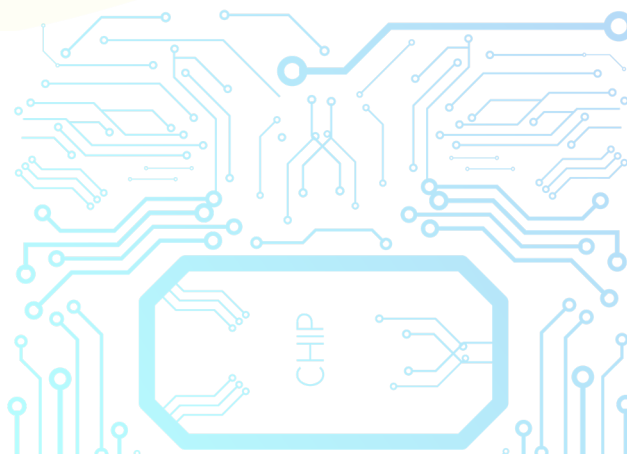

We deeply value our customers and believe that they deserve the most innovative technological solutions for all their needs. That's why we work relentlessly to provide them with high-tech solutions for every problem they bring to us.

## Employee Empowerment

We believe that our employees are the backbone of our company, and we are committed to providing them with a better life technologically and economically. We invest in their professional development and provide a working environment that fos-

## Technology Appreciation

At Addisway Technology Solutions, we believe that technology is a powerful tool that can change the world for the better. We are always appreciating, learning, and falling in love with it to keep up-to-date with new trends and provide the most innovative

## Our Products and Services

At Addisway Technology Solutions, we offer a range of products and services to meet our clients' technology needs. Our team of experts in these fields provides the highest quality solutions to help our clients

### Software Development

We provide customized software solutions that help our clients streamline their processes, manage their data efficiently and effectively, plus enhance their operations.

### Website Design and Hosting

We offer website design and hosting services that help our clients establish a strong online presence, increase their visibility, and expand their reach.

### Database Design

We design databases that help our clients manage and analyze their data, so they can make informed decisions and stay ahead of their competition.

### Graphic Design

We offer graphic design services that help our clients communicate their message effectively and creatively, using visual media such as logos, brochures, and posters.

### Digital Marketing

We provide digital marketing services that help our clients increase their brand awareness, drive more traffic to their website, and generate leads that can turn into customers.

### ICT Support

We offer ICT support services that help our clients manage their technological infrastructure, maintain the security and integrity of their data, and ensure the smooth running of their operations.

## Some of Our Best Products and Services

### Web Development

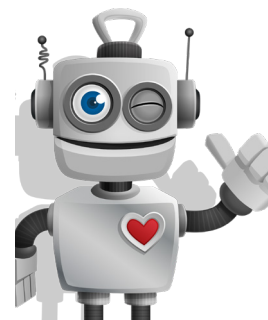

We design and develop exceptional, attractive, and responsive websites that are SEO-friendly, professional and innovative, and depict your company as a pioneer in the industry. Our team of experts has extensive experience in website design and development in Ethiopia and abroad, and we have wide exposure to the website-related business. Our website designs are intentionally structured to be responsive and compatible with every device, ensuring that users get a seamless experience when

### AI-enabled system development

AI-enabled system development: In today's rapidly advancing technological landscape, incorporating artificial intelligence (AI) into your business has significant benefits. From streamlining processes to analyzing large volumes of data quickly and efficiently, AI can enhance organizational performance and provide a competitive edge. However, developing an AI-enabled system can seem daunting, especially if you are not familiar with the technology or its application in your organization. That's where we come in.

Our team has extensive experience in AI development and can assist you from requirement gathering to development to ensure that your AI-enabled system is tailored to meet your specific business needs. We will work closely with you to gain a thorough understanding of your organization's processes, objectives, and constraints, and recommend the most appropriate AI solutions to achieve your desired outcomes.

## Shareholder Management System

Shareholder Management System is a software application designed to streamline the management of shareholders in a company. It helps companies to manage all aspects related to their shareholders, such as shareholder profiles, shareholdings, dividends, voting rights, proxy submissions, and communications, in a centralized and efficient manner. The system provides various tools and features to manage the shareholders' data, track their activities, and communicate with them easily. Shareholder Management System increases the transparency and security of the company's shareholder information, as well as improving the overall efficiency of the shareholder management process.

## The Property Management Rent Collection System

Our Property Management Rent Collection System is a digital platform designed to ease the process of collecting rent for rental properties. This system helps property managers to manage rental payments conveniently and efficiently. Property managers can set up payment schedules, track payment activities, and issue payment reminders to tenants. Additionally, the system can be integrated with various payment gateways to allow secure payment collection from tenants from any location. The Property Management Rent Collection System helps to reduce paperwork, minimize payment-related errors, and ensure timely payment collections. This system is suitable for property managers looking for a reliable and streamlined approach for rent management.

## School Management System

Our school management system is a unique and dynamic solution that streamlines the burdensome and day-to-day tasks of schools. Our system is multipurpose, modular and automates all works from registration to billing. It offers a range of modules that streamline operations for the school management team, allowing them to manage resources better, improve academic performance monitoring, and enable online payment solutions. Our system offers teachers extraordinary educational tools, teaching aids, and instructional resources, and it facilitates seamless online communication between parents, students, and the school.

Parents or guardians can perform their monthly payment without going to school physically using various E-Payment methods, and also can get daily and monthly reports of performance and attendance of their students through their mobile phones.

At Addisway Technology Solutions, our dynamic product line and services bridge the gap between technology and society. We ensure that our clients receive customized, cost-effective technological solutions to meet their unique needs, and we offer exceptional customer service to help our clients meet their goals.

## Hospital Management System

Our hospital management system is also a web application that can be accessed via mobile phones, laptops, or desktop computers from anywhere. With this system, patients can register and schedule appointments online, eliminating the need to physically visit the hospital. Clients can also view their medical records and lab results remotely. Additionally, the system includes a separate module for financial management tasks such as expense tracking, bill collection, payroll management,

Overall, the system is focused on improving patient welfare and easing the workload burden for hospital employees by ensuring informed consent and shared decision making.

## Online Educational System Toolkit

The Online Educational System Toolkit is a web application designed to facilitate the teaching and learning process during emergencies when traditional systems may not be feasible. This internet-based system allows for convenient access by users from anywhere with an internet connection

# ADDISWAY TECHNOLOGY

## Our Official Partners

AFRICOM Technologies is a leading IT solutions and services provider, established in 2004 G.C. The company is ISO certified and delivers services such as MIS consultancy, software development, Business Process Outsourcing (BPO), Single Window Projects, IT auditing, and E-commerce.

### Technical and Vocational Training Institute (TVTI)

Federal Technical and Vocational Education and Training Institute (FTVETI) was established in 2011 by The Council of Ministers Proclamation 245/2011 to produce highly professional and technically efficient TVET teachers and leaders. The driving force for establishing FTVETI , among other things , was that there were no institution to train competent and sufficient technical and vocational teachers and leaders based on the outcome based system and occupational standards.

## Our Clients

At Addisway Technology Solutions, we are committed to providing exceptional technological solutions to our clients. We strive to create customized, cost-effective, and innovative solutions for businesses in various industries.
